Student Accounts

- How much you owe for tuition and fees.
- A positive balance means you owe money, a negative balance means you'll be getting money back. Your tuition and fees have already been taken out of this amount. This is what you have left over for books/course materials or other educationally-related costs.
- Updated tuition and fees will appear mid-July.
- The financial aid you've qualified for will be authorized before the fees due date. This will keep you from being purged from your classes due to non-payment.
